Subject Index

Blepharitis
Comparative study of eyelid cleaning regiments in chronic blepharitis, 209

Book reviews
Atlas of clinical ophthalmology, 95

Bullous keratopathy
Irreversible bullous keratopathy after air bag trauma, 148

Cataract blindness
Mass cataract blindness (Letter), 10

CLAO
CLAO residents CL curriculum (Guest editorial), 157
Residency training in CLs: A survey, 168

Collagen shields
Preliminary study of the adsorption and release of preservatives by CLs and collagen shields, 61

Confocal microscopy
Transient corneal stromal and endothelial changes following soft CL wear: A study with confocal microscopy, 127
Diagnosis of bacterial CL-related keratitis with the white-light confocal microscope, 274

Conjunctivitis
CL induced conjunctivitis: A model of human ocular inflamation, 205

Conjunctiva
Bulbar conjunctival flourescein staining in hydrogel CL wearers, 189

Contact Lenses(CLs)
Bulbar conjunctival flourescein staining in hydrogel CL wearers, 189
Changes in corneal radius and thickness in response to extended wear of rigid gas permeable CLs, 133
Clinical assessment of holo-or trifocal diffractive CL, 245
Clinical presentation, prevalence, and risk factors of focal corneal infiltrates in soft CL wearers, 30
Clinical study of disposable CL wear: Brazilian experience, 102
CL induced conjunctivitis: A model of human ocular inflamation, 205
CL induced corneal acidosis, 70
Corneal curvature changes in soft and rigid gas permeable CL wearers after two years of lens wear, 186
Corneal stress test for extended wear, 75
Corneal warpage resolution after refitting RGP CL wear into hydrophilic high water content material, 242
Comparative disinfectant efficacy of two disinfecting solutions against *Pseudomonas aeruginosa*, 118
Comparative study of eyelid cleaning regiments in chronic blepharitis, 209
Defining contact lens terminology, 228
Diagnosis of bacterial CL-related keratitis with the white-light confocal microscope, 274
Dry eye: Pharmacological approaches, effects, and progress, 141
Effects of therapeutic CLs on intraocular pressure measurement, 262
Gram-negative bacteria can induce CL related acute red eye(CLARE) responses, 47
Haemophilus influenzae central corneal ulcer associated with cosmetic lens wear, 213
Indications and complications of therapeutic disposable acuvue CLs, 106
Influence of center of gravity and lens mass on rigid lens dynamics, 195
Influence of CL wear on the corneal topography of keratoconus, 270
Initial treatment of microbial keratitis, 136
Life expectancy of rigid gas permeable and high water content CLs, 258
Microbial contamination of CL cases among medical students, 21
New physiological paradigms to assess the effect of lens oxygen transmissibility on corneal health, 25
Non-contact specular microscopic observation for early reponse of corneal endothelium after CL wear, 122
Ocular and subjective responses to frequent replacement of daily wear soft CLs, 53
Peripheral corneal infiltrates associated with CL wear, 41
Polymers, Dk, and CLs: Now and in the future, 38
Preliminary study of the adsorption and release of preservatives by CLs and collagen shields, 61
Prospective clinical evaluation of sunsoft multifocal CL, 179
Quantitative and qualitative assessment of the NOVAWET-perception bifocal CL, 109
Real ophthalmologists "do fit CIs" (Editorial), 156
Regular replacement of extended wear rigid gas permeable CLs, 172
Residency training in CLs: A survey, 168
Role of the therapeutic CL in the management of recurrent corneal erosions: A review of treatment strategies, 79
Three year prospective study of the clinical performance of daily wear disposable CLs compared with frequent replacement and conventional daily wear CLs, 250
Topographic stability and saftey of CL use after penetrating keratoplasty, 64
Transient corneal stromal and endothelial changes following soft CL wear: A study with confocal microscopy, 127
Use of synthetic cecropin(D_5C) in disinfecting CL solutions, 114
Visually debilitating pterygium: Surgical and CL treatment, 83
Xanthomonas maltophilia keratitis associated with CIs (Letter), 158

Contact lens complications
CL induced corneal acidosis, 70
Corneal melting in a chronic alcoholic CL wearer, 146
Ocular and subjective responses to frequent replacement of daily wear soft CLs, 53
Three year prospective study of the clinical performance of daily wear disposable CLs compared with frequent replacement and conventional daily wear CLs, 250

Contact lens disinfection
Comparative disinfectant efficacy of two disinfecting solutions against *Pseudomonas aeruginosa*, 118
Microbial contamination of CL cases among medical students, 21
Use of synthetic cecropin(D_5C) in disinfecting CL solutions, 114

Contact lens induced acute redeye
Gram-negative bacteria can induce CL related acute red eye(CLARE) responses, 47

Contact lens polymers
Polymers, Dk, and CLs: Now and in the future, 38

Contact lens solutions
Comparative disinfectant efficacy of two disinfecting solutions against *Pseudomonas aeruginosa*, 118
Preliminary study of the adsorption and release of preservatives by CLs and collagen shields, 61
Use of synthetic cecropin(D_5C) in disinfecting CL solutions, 114

Contrast sensitivity
Clinical assessment of holo-or trifocal diffractive CL, 245

Corneal acidosis
CL induced corneal acidosis, 70

Corneal edema
Corneal stress test for extended wear, 75

Corneal endothelium
CL induced corneal acidosis, 70
Irreversible bullous keratopathy after air bag trauma, 148
New physiological paradigms to assess the effect of lens oxygen transmissibility on corneal health, 25
Non-contact specular microscopic observation for early reponse of corneal endothelium after CL wear, 122
Transient corneal stromal and endothelial changes following soft CL wear: A study with confocal microscopy, 127

Corneal epithelium
CL induced corneal acidosis, 70
New physiological paradigms to assess the effect of lens oxygen transmissibility on corneal health, 25

Corneal erosion
Role of the therapeutic CL in the management of recurrent corneal erosions: A review of treatment strategies, 79

Corneal hypoxia
Corneal stress test for extended wear, 75

Corneal infiltrates
Clinical presentation, prevalence, and risk factors of focal corneal infiltrates in soft CL wearers, 30
Diagnosis of bacterial CL-related keratitis with the white-light confocal microscope, 274
Gram-negative bacteria can induce CL related acute red eye(CLARE) responses, 47
Oerskovia xanthineolytica keratitis (Letter), 96
Peripheral corneal infiltrates associated with CL wear, 41
Xanthomonas maltophilia keratitis associated with CIs (Letter), 158

Corneal melting
Corneal melting in a chronic alcoholic CL wearer, 146

Corneal stroma
CL induced corneal acidosis, 70
Transient corneal stromal and endothelial changes following soft CL wear: A study with confocal microscopy, 127

Corneal topography
Automated topographic screening for keratoconus in refractive surgery candidates, 164
Corneal warpage resolution after refitting RGP CL wear into hydrophilic high water content material, 242
Influence of CL wear on the corneal topography of keratoconus, 270
Topographic stability and saftey of CL use after penetrating keratoplasty, 64
Visually debilitating pterygium: Surgical and CL treatment, 83

Corneal trauma
Irreversible bullous keratopathy after air bag trauma, 148

Corneal ulcers
Corneal melting in a chronic alcoholic CL wearer, 146
Corneal stress test for extended wear, 75

Comparative disinfectant efficacy of two disinfecting solutions against *Pseudomonas aeruginosa*, 118
Haemophilus influenzae central corneal ulcer associated with cosmetic lens wear, 213
Oerskovia xanthineolytica keratitis (Letter), 96
Microbial keratitis (Letter), 222
Peripheral corneal infiltrates associated with CL wear, 41

Corneal warpage
Corneal warpage resolution after refitting RGP CL wear into hydrophilic high water content material, 242
Influence of CL wear on the corneal topography of keratoconus, 270

Disposable contact lenses
Clinical presentation, prevalence, and risk factors of focal corneal infiltrates in soft CL wearers, 30
Clinical study of disposable CL wear: Brazilian experience, 102
Defining contact lens terminology, 228
Indications and complications of therapeutic disposable acuvue CLs, 106
Three year prospective study of the clinical performance of daily wear disposable CLs compared with frequent replacement and conventional daily wear CLs, 250

Dry eye
Dry eye: Pharmacological approaches, effects, and progress, 141

Editorials
Are you ready for PRK? 4
International ophthalmology and CLs, 92
Real ophthalmologists "do fit CLs", 156
The CLAO Journal: Going on-line and growing in size, 221

Endothelial blebs
Non-contact specular microscopic observation for early reponse of corneal endothelium after CL wear, 122
Transient corneal stromal and endothelial changes following soft CL wear: A study with confocal microscopy, 127

Excimer laser
Ablation for the nation (Guest editorial), 8
Are you ready for PRK? (Editorial), 4
Automated topographic screening for keratoconus in refractive surgery candidates, 164

Extended wear
Clinical presentation, prevalence, and risk factors of focal corneal infiltrates in soft CL wearers, 30
Clinical study of disposable CL wear: Brazilian experience, 102
Corneal stress test for extended wear, 75
Peripheral corneal infiltrates associated with CL wear, 41
Regular replacement of extended wear rigid gas permeable CLs, 172
Three year prospective study of the clinical performance of daily wear disposable CLs compared with frequent replacement and conventional daily wear CLs, 250

Eyelid hygiene
Comparative study of eyelid cleaning regiments in chronic blepharitis, 209

Florescein staining
Bulbar conjunctival flourescein staining in hydrogel CL wearers, 189

Frequent replacement contact lenses
Ocular and subjective responses to frequent replacement of daily wear soft CLs, 53
Peripheral corneal infiltrates associated with CL wear, 41
Regular replacement of extended wear rigid gas permeable CLs, 172
Three year prospective study of the clinical performance of daily wear disposable CLs compared with frequent replacement and conventional daily wear CLs, 250

Guest editorials
Ablation for the nation, 8
CLAO residents CL curriculum, 157
Defining contact lens terminology, 228
Question of sunglassess, 94

Intraocular pressure
Effects of therapeutic CLs on intraocular pressure measurement, 262

Keratoconus
Automated topographic screening for keratoconus in refractive surgery candidates, 164
Influence of CL wear on the corneal topography of keratoconus, 270
Rate of visual recovery after penetrating keratoplasty for keratoconus, 266

Keratometry
Changes in corneal radius and thickness in response to extended wear of rigid gas permeable CLs, 133
Corneal curvature changes in soft and rigid gas permeable CL wearers after two years of lens wear, 186
Topographic stability and saftey of CL use after penetrating keratoplasty, 64

Microbial keratitis
Comparative disinfectant efficacy of two disinfecting solutions against pseudomonas aeruginosa, 118
Corneal stress test for extended wear, 75
Diagnosis of bacterial CL-related keratitis with the white-light confocal microscope, 274
Gram-negative bacteria can induce CL related acute red eye(CLARE) responses, 47
Haemophilus influenzae central corneal ulcer associated with cosmetic lens wear, 213
Initial treatment of microbial keratitis, 136
Microbial contamination of CL cases among medical students, 21
Microbial keratitis (Letter), 222
Oerskovia xanthineolytica keratitis (Letter), 96
Peripheral corneal infiltrates associated with CL wear, 41
Use of synthetic cecropin(D_2C) in disinfecting CL solutions, 114
Xanthomonas maltophilia keratitis associated with CLs (Letter), 158

Multifocal contact lenses
Clinical assessment of holo-or trifocal diffractive CL, 245
Prospective clinical evaluation of sunsoft multifocal CL, 179
Quantitative and qualitative assessment of the NOVAWET-perception bifocal CL, 109

Ocular inflammation
CL induced conjunctivitis: A model of human ocular inflamation, 205

Oxygen transmissibility
New physiological paradigms to assess the effect of lens oxygen transmissibility on corneal health, 25
Non-contact specular microscopic observation for early reponse of corneal endothelium after CL wear, 122
Polymers, Dk, and CLs: Now and in the future, 38

Pachymetry
Changes in corneal radius and thickness in response to extended wear of rigid gas permeable CLs, 133
Corneal stress test for extended wear, 75

Penetrating keratoplasty
Irreversible bullous keratopathy after air bag trauma, 148
Rate of visual recovery after penetrating keratoplasty for keratoconus, 266
Topographic stability and saftey of CL use after penetrating keratoplasty, 64

Photorefractive keratectomy
Are you ready for PRK?(Editorial), 4
Ablation for the nation (Guest editorial), 8

Phototherapeutic keratotemy
Role of the therapeutic CL in the management of recurrent corneal erosions: A review of treatment strategies, 79

PMMA contact lenses
Corneal curvature changes in soft and rigid gas permeable CL wearers after two years of lens wear, 186

Practice management
Question of sunglasses (Guest editorial), 94

Presbyopia
Clinical assessment of holo-or trifocal diffractive CL, 245
Prospective clinical evaluation of sunsoft multifocal CL, 179
Quantitative and qualitative assessment of the NOVAWET-perception bifocal CL, 109

Pterygium
Visually debilitating pterygium: Surgical and CL treatment, 83

Radial keratotomy
Automated topographic screening for keratoconus in refractive surgery candidates, 164

Residency education
Residency training in CLs: A survey, 168

RGP contact lenses
Changes in corneal radius and thickness in response to extended wear of rigid gas permeable CLs, 133
Corneal curvature changes in soft and rigid gas permeable CL wearers after two years of lens wear, 186
Corneal warpage resolution after refitting RGP CL wear into hydrophilic high water content material, 242
Influence of center of gravity and lens mass on rigid lens dynamics, 195
Life expectancy of rigid gas permeable and high water content CLs, 258
Peripheral corneal infiltrates associated with CL wear, 41
Quantitative and qualitative assessment of the NOVAWET-perception bifocal CL, 109

Smoking and contact lenses
Clinical presentation, prevalence, and risk factors of focal corneal infiltrates in soft CL wearers, 30

Specular microscopy
Non-contact specular microscopic observation for early reponse of corneal endothelium after CL wear, 122

Therapeutic contact lenses
Effects of therapeutic CLs on intraocular pressure measurement, 262
Indications and complications of therapeutic disposable acuvue CLs, 106
Role of the therapeutic CL in the management of recurrent corneal erosions: A review of treatment strategies, 79

Vitamin A deficiency
Corneal melting in a chronic alcoholic CL wearer, 146
